

Find where your system fits.

Explore concrete integration boundaries across the game world, shared evidence and the proposed canonical market.

Objects and actions

World Graph Phase 1 supplies implemented material and crafting relationships. Discuss integrations against current APIs and explicit custody rules.

Evidence and collaboration

Coordination pilots demonstrate original discoveries and scoped sharing. Later delegation and economic adapters remain planned.

Capital and family interests

Market V2 proposes fixed fee destinations, finite reserves, inventory bonds, Turf fee rights and liquidity commitments. Treat these as candidate mechanisms.

Market V2 is not deployed or funded. No partnership, financial return, launch date or integration commitment is implied.
